

INDUSTRIAL SOLDERING EXPERT

Professional Training Course

Duration: 27 days, 218 hours, spread over 8 months

Location: Microsolder Kft. Training Room, 1037 Budapest, Kiscsillag u. 18

Course Objective:

This comprehensive professional training was developed in response to the recognition that many industrial facilities frequently face gaps in soldering expertise.

One-off annual courses are often insufficient to address these shortcomings.

Therefore, we have assembled a package from our range of courses that provides a solid foundation for the technical management, quality assurance, and problem-solving of soldering activities.

The package includes both technological and IPC certification courses. Additionally, it is complemented by a customized, company- and participant-specific on-site session.

With the expertise gained, companies can prevent and avoid numerous costly operational problems, defects, downtime, and customer complaints.

Microsolder Kft. is an IPC member, an authorized IPC distributor, an authorized IPC training center, and an IPC QML (Qualified Manufacturer Listing) auditor.
